While this electromagnetic interference analysis has been carried out under controlled conditions, these are subjective reviews conducted on single product samples and results may vary. Purchasers and users of these products should form their own conclusions about the appropriate use of any items reviewed in these reports.

Comment

Compact PC's are often an integral part of portable operation for contact logging and digital modes. It is important that they do not affect any of the Amateur bands. Fortunately, this little PC is RF quiet across the Amateur Radio spectrum. This includes both AC Mains and battery operation. An excellent choice for any Amateur station operating in the field.

Recommendation:
Excellent product for
Amateur Radio use
