

## Profiling the Noise

A data information sheet to assist hams in identifying noise

### *Profiling the noise*

Use this form with the Noise Logging template to build up a profile of your noise, providing you with a solid analysis on which to identify and resolve your noise.

Consider the following characteristics of your noise problem/s.

Noise Characteristic	Comments
Have you ruled out noise sources inside your property?	
Is it occurring at specific times of day?	
Are you able to suggest any likely sources that may have a causal relationship?	
Is it originating from a particular direction?	
Are you able to identify the noise when compared to sample noise signals at <a href="http://qrm.guru/identifying-the-noise-useful-links/">http://qrm.guru/identifying-the-noise-useful-links/</a>	
Are you able to link the noise in with any domestic or recreational routines in the household that may indicate the source of the noise?	
Is the noise broadband or centred on particular frequencies?	
Are you able to identify a range of frequencies the noise centres on? (highest and lowest frequencies)
